

NEARITY A50 Ceiling Array Microphone Solution

Lossless Audio Magic In Action

91-Element
Microphone Array

Deep Sidelobe
Beamforming

8 Meter
Sound Pickup

Daisy-Chain
Expansion

AI Noise-
Suppression

Full-Duplex

The NEARITY A50 is an integrated, in-ceiling array microphone solution for video conferencing and in-room audio. With advanced beamforming technology and a 91-element microphone, A50 ensures that every word is clear to both participants on the scene or remotely. The NEARITY A50 is an incredible productivity tool for different spaces such as boardrooms, huddle rooms, and multi-purpose spaces.

Product Features

Meeting equality for every corner

Featuring 91 element MEMS microphones and deep sidelobe beamforming, NEARITY A50 can precisely pick up sound for up to 12 independent lobes.

Ultimate productivity for all of your space

NEARITY A50 can automatically detect position the speaker in a room and pick up consistent sound while the speaker is walking around. The integrated design allows you to eliminate all equipment clutter, leaving more room to share and work.

Simple room expansion with daisy-chains

The NEARITY A50 can be daisy-chained (up to 8 A50 devices) to extend audio capacity and cover larger space.

Clear sound even in challenging environments

The NEARITY A50 substantially reduces or removes reverb and echoes in your space through both traditional and AI based algorithms

- 91-Element Microphone Array
- 12 Deep Sidelobe Beamforming
- **8m** effective Pickup Range
- Daisy-Chain Up To 8 Devices
- AI Noise-Suppression
- True Full Duplex
- Digital Signal Processing (DSP)

NEARITY A50 Technical Specifications

Microphone Features

- 91-element omnidirectional microphone array
- -38dBV/Pa 94dB SPL@1kHz
- 63dBV/Pa 94dB SPL@1kHz,A-weighted
- **8m** effective pickup distance

Audio Characteristics

- 12 deep sidelobe beamforming
- Maximum background noise suppression: 30dB
- True full-duplex technology
- Echo cancellation
- Automatic Gain Control (AGC)
- Reverberation suppression
- Feedback suppression
- Adaptive beaming
- Intelligent mixing DSP

Daisy-chain

- POE UTP RJ45 (CAT6)
- Maximum daisy chain: 8 A50 units

Physical Characteristics

- Width: 603mm (23.74 in)
- Depth: 603mm (23.74in)
- Installation: ceiling mount
- 2 POE network ports for daisy chain and power supply
- Color: White
