Key Features and Benefits

20 MP | SONY 1-inch CMOS | Super-Wide 133° Field of View

20 MP camera with SONY 1-inch CMOS brings UHD 4K video conference with delicate details. With super-wide 133° field of view, everyone in the conference can be seen without adjusting the camera. Moreover, the image brightness can be automatically optimized even in a dim or backlight environment, ensuring the participant faces can be seen clearly.

Sound Localization for Full-Duplex Mode

8 MEMS microphone arrays make MeetingEye 400 Pro have stronger ability of noise proof and dereverberation. The new upgraded audio algorithm, together with the technology of post-processing on acoustic echo cancellation and the dereverberation algorithm, brings high quality full-duplex call and realizes more precise voice pickup.

Smart Video Conferencing with AI Technology

Featuring AI technology, including Auto Framing and Speaker Tracking, MeetingEye 400 Pro can not only automatically adjust the image size according to the number and the position of the participants, but also automatically zoom in the speaker without adjusting the camera, making the participants more focus on the conference.

Secure Conference with Auto Camera Privacy Shutter

The camera privacy shutter automatically opens when the video conference starts and remains closed when not having video conferences. The lens status is visible at a glance, eliminating "lens anxiety" in daily conferences.

USB Mode, Act as PC Audio & Video Peripherals

Compatible with mainstream video conferencing apps, MeetingEye 400 Pro can work with VCH51 and act as the PC audio and video peripherals via a USB Type-C cable to provide excellent audio and video experience for different cloud platforms.
